Invented for life

Universal *QUICK* FIT+ Tire Pressure Monitoring System Sensors

Since 2007, all new vehicles within the US must be equipped with a tire pressure monitoring system (TPMS). Bosch Universal TPMS Sensors measure the air pressure directly on the vehicle's tires and reliably transmit it by radio to the control unit in real time. Continuous monitoring of the tire pressure prevents unnoticed pressure deviations – making an important contribution to road safety. Adherence to the recommended tire pressure also ensures optimized fuel consumption and reduced tire wear. For easy and safe operation, Bosch recommends using the Bosch TPA 400 programming tool.

High vehicle coverage
with just a few part numbers

Time saving due to easy programming and mounting (*QUICK* FIT+)

Quality and reliability at original equipment level

Advantages at a glance:

- Universally programmable: 97% vehicle coverage with just three part numbers
- Available in rubber and steel versions, with matching steel and aluminum rim design
- Function and quality tests according to the same standards as original equipment
- Compatible with most major tool brands in the market

Part Number	Description
0273014069 – QF0470	Clamp-in Metal Valve – Silver
0273014076 – QF0476	Clamp-in Metal Valve – Black
0273014068 – QF0471	Snap-in Rubber Valve – Black
